

Yukta Nagle

Full Stack Software Engineer | 4+ Years Experience | Python • Node.js • AWS • Generative AI • React
yuktanagle025@gmail.com · +91-8982315022 · Indore, M.P., India · [linkedin.com/in/yukta-nagle-645953216](https://www.linkedin.com/in/yukta-nagle-645953216)

PROFESSIONAL SUMMARY

Versatile Full Stack Software Engineer with 4+ years of experience designing, building, and deploying scalable web applications and APIs. Proven expertise in backend frameworks (FastAPI, Node.js) and modern frontend technologies (JavaScript, React). AWS Developer Associate certified with hands-on experience in cloud architecture, Generative AI systems, LLMs, and serverless infrastructure. Adept at collaborating within cross-functional teams, managing end-to-end project delivery, and architecting intelligent, enterprise-grade solutions that drive measurable business impact.

TECHNICAL SKILLS

Backend

Python

FastAPI

Node.js

REST API Design

Frontend

JavaScript

React.js

HTML5

CSS3

Cloud / DevOps

AWS (Developer Associate Certified)

Azure

Grafana

Git

GitHub

Containers

Docker

Kubernetes

AI / ML

LLMs

Generative AI

TensorFlow

DeepFace

MediaPipe

OpenCV

AutoGen

Databases

PostgreSQL

MySQL

DynamoDB

Amazon RDS

MongoDB

SQLAlchemy

Tools

Postman

AWS SDK

Redis

Keycloak

Azure Blob Storage

Apache Kafka

PROFESSIONAL EXPERIENCE

Yash Technologies Pvt. Ltd.

- Software Engineer
- Feb 2022 – Present
- Designed and implemented end-to-end full stack solutions — scalable Python/FastAPI backends paired with dynamic React frontends across multiple enterprise AI projects.
 - Specialized in architecting Generative AI systems using LLMs, FastAPI, and AWS serverless infrastructure, enhancing automation and intelligent decision-making.
 - Built and maintained high-availability cloud systems on AWS leveraging Lambda, API Gateway, DynamoDB, S3, ECS, and EventBridge for production workloads.
 - Collaborated with cross-functional teams and stakeholders to deliver project milestones on time; contributed to internal Cloud Guru training sessions on Amazon SNS and SQS.

PROJECTS

- NIA – Next Intelligent Agent
- Nov 2024 – Present
- FastAPI Python PostgreSQL SQLAlchemy JWT AWS SDK Keycloak React Apache Kafka
- Architected a comprehensive multi-tenant AI agent administration platform with REST APIs in FastAPI, secured via JWT Bearer authentication and fine-grained RBAC across 8 roles (PLATFORM_ADMIN, SUPER_ADMIN, ADMIN, TEAM_OWNER, AGENT_OWNER, FinOps, Responsible AI, Team Management).
 - Designed full AI agent lifecycle management — LLM model configuration, PII input/output controls, SharePoint data source integration, vector embedding pipeline triggers, and agent-role access mappings.
 - Built an intelligent A2A routing server dynamically dispatching user prompts to the most relevant specialized agent (RFP Analysis, Code Helper, Discovery Accelerator), improving response accuracy by 30%.
 - Developed team & quota management with per-model LLM configs, monthly token quota policies, and automated cron-protected rollover background tasks with real-time usage analytics dashboards.
 - Implemented a full-featured support ticket system with Azure DevOps work-item integration for issue tickets and automated email acknowledgment workflows for feedback tickets.

- Architected approval workflows for restricted role assignments; enforced data-level security with soft-delete audit history, at-rest credential encryption, and API key masking.
- Utilized Apache Kafka for real-time message queuing and async communication between middleware, ensuring high availability and low-latency interactions under peak loads.

■ **Survey Lens**

Jun 2023 – Sep 2024

Node.js FastAPI Python AWS Lambda S3 DynamoDB API Gateway EventBridge TensorFlow DeepFace
Grafana Generative AI React.js

- Developed a dynamic survey creation module with a custom form builder and bulk distribution system using React.js, enhancing user experience and survey reach by 40%.
- Architected and deployed scalable backend infrastructure on AWS, utilizing Lambda, S3, DynamoDB, API Gateway, and EventBridge for high availability and performance.
- Enabled multimedia response uploads (image, audio, video), integrating TensorFlow and DeepFace models for advanced analysis, improving data accuracy and participant engagement by 30%.
- Implemented real-time interactive response visualization dashboards using Grafana, facilitating quick insights and data-driven decision making.
- Leveraged Generative AI models to automate survey form creation and provide intelligent response summarization, reducing survey preparation time by 50%.

■ **AI Interviewer**

Apr 2022 – Feb 2023

FastAPI Python MediaPipe OpenCV DeepFace ArcFace MTCNN AutoGen Azure Blob Storage

- Developed an AI-powered interview platform using FastAPI, incorporating resume evaluation, dynamic question generation, speech processing, video recording, and real-time candidate engagement monitoring.
- Implemented real-time face streaming and engagement detection leveraging MediaPipe and OpenCV, accurately tracking iris movement for automated proctoring.
- Engineered identity verification through facial comparison using DeepFace with ArcFace and MTCNN, optimizing async image processing for secure, reliable candidate authentication.
- Designed backend services for automated resume parsing and AI-driven question generation using AutoGen, enhancing question relevancy and reducing manual intervention.
- Integrated Azure Blob Storage for secure file management with pre-signed URL mechanisms for controlled, audited access to candidate resumes, improving data security compliance.

EDUCATION

B.Tech / B.E. – Computer Science and Engineering (CSE)

Institute of Engineering and Technology (IET DAVV), Indore | 2022

CERTIFICATIONS & AWARDS

- **AWS Certified Developer – Associate** — Amazon Web Services

Star Achiever

Awarded for providing targeted, impactful solutions that assisted team members and accelerated project delivery.

Best New Trainer Award

Recognized as the best new trainer for conducting an internal Cloud Guru training session on Amazon SNS and SQS.
